

FINAL: QUESTION 3

In question 2 the `mongod` on port 27003 does a rollback. Go to that mongod's data directory. Look for a `rollback` directory inside. Find the `.bson` file there. Run the `bsondump` utility on that file. What are its contents?

- ☐ There is no such file.
- ☐ It contains 2 documents.
- ☐ It contains 3 documents.
- ☐ It contains 4 documents.
- ☐ It contains 8 documents.
- ☐ The file exists but is 0 bytes long.
