

HOMEWORK: HOMEWORK 1.4

How would you print out, in the shell, the name of all the products without extraneous characters or braces, sorted alphabetically, ascending? (Check all that would apply.)

- ☐ `var c = db.products.find({}).sort({name:-1}); while(c.hasNext()) print(c.next().name);`
- ☐ `db.products.find({}, {name:1, _id:0}).sort({name:1})`
- ☒ `var c = db.products.find({}).sort({name:1}); c.forEach(function(doc){ print(doc.name) });`
- ☒ `var c = db.products.find({}, {name:1, _id:0}).sort({name:1}); while(c.hasNext()) print(c.next().name);`
