

## HOMEWORK: HOMEWORK 6.2

Let's suppose you have a five member replica set and want to assure that writes are committed to the journal and are acknowledged by at least 3 nodes before you proceed forward. What would be the appropriate settings for w and j?

- ☐ w=1, j=1
- ☒ w="majority", j=1
- ☐ w=3, j=0
- ☐ w=5, j=1
- ☐ w=1, j=3
