

HOMEWORK: HOMEWORK 1.2

Download the file [products.json](#) from [education.mongodb.com](#). Take a look at its content.

Now, import its contents into MongoDB, into a database called "pcat" and a collection called "products". Use the mongoimport utility to do this.

When done, run this query in the mongo shell:

```
db.products.find({type:"case"}).count()
```

What's the result?

```
1 3
```
