HOMEWORK: HOMEWORK 6.3

Which of the following statements are true about choosing and using a shard key:

✔ ☐ The shard key must be unique

☑ There must be a index on the collection that starts with the shard key.

☑ Mongo can not enforce unique indexes on a sharded collection other than the shard key itself.

☑ Any update that does not contain the shard key will be sent to all shards.

☐ You can change the shard key on a collection if you desire.
